

Soil Association Organic Standards for Great Britain

Summary of standards changes – document updated 18th May 2026

Contents

1. Updates to GB and SA GB Food & Drink standards.....	2
2. Updates to GB and SA GB Farming & Growing Standards.....	6
3. Updates to GB and SA GB Aquaculture standards	10
4. Updates to GB and SA GB Feed Processing Standards.....	12
5. Updates to GB Abattoir & Slaughter Standards	16
6. Updates to GB and SA GB Seaweed Standards	16
7. Updates to SA Glossary	19
8. Updates to SA Sourcing Annex.....	19
9. Standards that have no significant updates.....	20

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

1. Updates to GB and SA GB Food & Drink standards

Standard	Description of changes	Reason for update
5.9.1 - using accurate descriptions* (baseline)	<p>This text has been removed from the guidance:</p> <p>If you produce organic and non-organic lines in the same range, you need to make sure that the packaging is sufficiently distinguishable (for example by colour, design or wording) to prevent confusion.</p>	Misleading labelling is already covered in legislation.
5.16 - Packaging (higher)	<p>The following text has been added to the packaging standards.</p> <p><u>Following feedback from licensees we have paused the implementation of our 2024/25 updated packaging standards. Whenever we review our higher standards, the process is focused on achieving impact through best practice and reasonable implementation. The implementation of the updated packaging standards has highlighted challenges with conveying technical information about packaging through supply chains and so has been paused until further notice whilst we undertake a further review. This is an important topic which we are committed to getting right. Please direct any feedback to standards@soilassociation.org.</u></p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
5.16.3 -Paper, card and wood-pulp packaging products (higher)	<p>The standard is amended as follows:</p> <p>*This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<p>The guidance is amended as follows:</p> <p>Any packaging purchased from September 2025 must be compliant. Packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
<p>5.16.4 - Plastic materials, coatings, dyes or inks containing phthalates (higher)</p>	<p>The standard is amended as follows:</p> <p>The <u>implementation of the changes to this standard come into effect from September 2025 are paused while a review is undertaken.</u></p> <p>The guidance is amended as follows:</p> <p>Until September 2025 The restriction applies to plastic materials, coatings, dyes, or inks in contact with foodstuffs.</p> <p>From September 2025, the restriction will apply to all packaging, whether in contact with foodstuffs or not. Any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
<p>5.16.5 - PVC and other chlorinated plastics (higher)</p>	<p>The guidance is updated as follows:</p> <p>This restriction applies to all chlorinated plastics which includes:</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<ul style="list-style-type: none"> polyvinyl chloride (PVC) polyvinylidene chloride (PVdC) (applied from September 2025) vinyl chloride <p>For products containing PVdC, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	
5.16.8 - Oxo-degradable Plastics (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
5.16.9 - Polystyrene (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
5.16.10 - PFAS (Per- and polyfluoroalkyl substances) (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
6.4.2 – Permitted additives (baseline)	<p>The following entries were amended as follows.</p> <p>Name: E220 Sulphur dioxide Specific conditions: In fruit wines without added sugar (including cider and perry) or in mead: 100mg4</p>	This is to clarify how this standard applies to mulled cider and wine.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<p>(see standard 6.4.3. for additional SA standard related to free sulphur dioxide levels). <u>For mulled cider, you must also meet these requirements.</u></p> <p>Name: E224 Potassium metabisulphite Specific conditions: In fruit wines and mead with and without added sugar (including cider and perry): 100 mg/l4 (see standard 6.4.3. for additional SA standard related to free sulphur dioxide levels). <u>For mulled cider, you must also meet these requirements.</u></p>	
<p>6.4.3 – Free sulphur dioxide levels (higher)</p>	<p>The guidance text is amended as follows.</p> <p>In order to demonstrate compliance, you will need to prove that the free SO2 level does not exceed this level – this could be by regular testing of products. <u>For mulled cider, you must also meet these requirements. This standard does not apply to fruit wines, cider and mead when used as an ingredient in a product, e.g. a pork and cider pie.</u></p>	<p>This is to clarify how this standard applies to mulled cider and wine.</p>
<p>6.9.3 – Additives and processing aids* (baseline)</p>	<p>This standard has been updated as follows.</p> <p>Product/substance: Sulphur dioxide, Potassium bisulphite or potassium metabisulphite.</p> <p>Specific conditions: See standards 6.9.4 and 6.9.5 for permitted levels. <u>For mulled wines, you must also meet these requirements.</u></p>	<p>This is to clarify how this standard is applied.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

<p>6.9.4 – Sulphur dioxide levels for Soil Association certified wines (higher)</p>	<p>The following text has been added to the guidance. <u>For mulled wines, you must also meet these requirements. This standard does not apply to wines when used as an ingredient in a product, e.g. a beef and red wine sausage</u></p>	<p>This is to clarify how this standard is applied.</p>
--	--	---

2. Updates to GB and SA GB Farming & Growing Standards

Standard	Description of changes	Reason for update
<p>1.16 - Packaging (higher)</p>	<p>The following text has been added to the packaging standards. <u>Following feedback from licensees we have paused the implementation of our 2024/25 updated packaging standards. Whenever we review our higher standards, the process is focused on achieving impact through best practice and reasonable implementation. The implementation of the updated packaging standards has highlighted challenges with conveying technical information about packaging through supply chains and so has been paused until further notice whilst we undertake a further review. This is an important topic which we are committed to getting right. Please direct any feedback to standards@soilassociation.org.</u></p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>
<p>1.16.3 - Paper, card and wood-pulp packaging products (higher)</p>	<p>The standard is amended as follows: *This standard comes into effect from September 2025. <u>The implementation of this standard is paused while a review is undertaken.</u></p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<p>The guidance is amended as follows:</p> <p>Any packaging purchased from September 2025 must be compliant. Packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	
<p>1.16.4 - Plastic materials, coatings, dyes or inks containing phthalates (higher)</p>	<p>The standard is amended as follows:</p> <p>The <u>implementation of the</u> changes to this standard <u>come into effect from September 2025 are paused while a review is undertaken.</u></p> <p>The guidance is amended as follows:</p> <p><u>The restriction applies to plastic materials, coatings, dyes, or inks in contact with foodstuffs. This restriction applies to all packaging products in scope and is not restricted to plastic materials. However, for plastic materials, coatings, dyes, or inks in contact with foodstuffs the restriction applies from September 2025. For those specific products, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</u></p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>
<p>1.16.5 - PVC and other chlorinated plastics (higher)</p>	<p>The guidance is updated as follows:</p> <p>This restriction applies to all chlorinated plastics which includes:</p> <ul style="list-style-type: none"> • polyvinyl chloride (PVC) 	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<ul style="list-style-type: none"> • polyvinylidene chloride (PVdC) (applied from September 2025) • vinyl chloride <p>For products containing PVdC, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	
1.16.8 - Oxo-degradable Plastics (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
1.16.9 - Polystyrene (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
1.16.10 - PFAS (Per- and polyfluoroalkyl substances) (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
3.5.2 - Animal mutilations are restricted (baseline)	<p>The mutilations guidance text has been changed to a table format to more clearly convey the specific parameters of procedures for beef & sheep.</p>	To make the standard clearer and less open to interpretation. For example, which practices require pain relief.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

<p>3.10.4 - Feeding organic and in-conversion feed (baseline)*</p>	<p>The standard is amended as follows.</p> <p>b) up to 20% of the total average amount of feed can be first year conversion perennial forage crops and protein crops, only if they are produced from your own holding which must:</p> <ul style="list-style-type: none"> • <u>be sown under organic management on land in first year of conversion.</u> • <u>be part of the holding itself and,</u> • <u>not have been under organic production of that holding in the last five years.</u> 	<p>To ensure the SA Standard meets regulatory requirements.</p>
<p>3.10.7 - Use of non-organic protein for pigs and poultry (baseline)</p>	<p>The standard is amended as follows.</p> <p>1. If you cannot source 100% organic feeds that meet the nutritional needs of your animals, you may feed pigs and poultry up to 5% non-organic protein feed until 31st December 2025. From 1st January 2026 you may feed piglets of not more than 35kg in weight and poultry not more than 30 weeks old up to 5% non-organic protein feed.</p>	<p>Regulatory update from DEFRA</p>
<p>3.11.1 - Transport and handling (baseline)</p>	<p>The guidance is amended as follows.</p> <p><u>Animals should be able to bear weight on all four legs without pain and be able to walk onto the vehicle unaided. If a cow needs shackles to stand or walk, it is not fit for transport.</u></p>	<p>There is a legal requirement that if a cow needs shackles to stand or walk, it is not fit for transport. The guidance has been updated to clarify this.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

3. Updates to GB and SA GB Aquaculture standards

Standard	Description of changes	Reason for update
13.19.1 - Using Accurate Descriptions* (baseline)	<p>The text has been removed from the guidance.</p> <p>If you produce organic and non-organic lines in the same range, you need to make sure that the packaging is sufficiently distinguishable (for example by colour, design or wording) to prevent confusion.</p>	Misleading labelling is already covered in legislation.
13.20 - Packaging (higher)	<p>The following text has been added to the packaging standards.</p> <p><u>Following feedback from licensees we have paused the implementation of our 2024/25 updated packaging standards. Whenever we review our higher standards, the process is focused on achieving impact through best practice and reasonable implementation. The implementation of the updated packaging standards has highlighted challenges with conveying technical information about packaging through supply chains and so has been paused until further notice whilst we undertake a further review. This is an important topic which we are committed to getting right. Please direct any feedback to standards@soilassociation.org.</u></p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
13.20.3 - Paper, card and wood-pulp packaging products (higher)	<p>The standard is amended as follows:</p> <p>*This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<p>The guidance is amended as follows:</p> <p>Any packaging purchased from September 2025 must be compliant. Packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	
<p>13.20.4 - Plastic materials, coatings, dyes or inks containing phthalates</p> <p>(higher)</p>	<p>The standard is amended as follows:</p> <p>The <u>implementation of the</u> changes to this standard <u>come into effect from September 2025 are paused while a review is undertaken.</u></p> <p>The guidance is amended as follows:</p> <p><u>The restriction applies to plastic materials, coatings, dyes, or inks in contact with foodstuffs. This restriction applies to all packaging products in scope and is not restricted to plastic materials. However, for plastic materials, coatings, dyes, or inks in contact with foodstuffs the restriction applies from September 2025. For those specific products, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</u></p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>
<p>13.20.5 - PVC and other chlorinated plastics</p> <p>(higher)</p>	<p>The guidance is updated as follows:</p> <p>This restriction applies to all chlorinated plastics which includes:</p> <ul style="list-style-type: none"> • polyvinyl chloride (PVC) 	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<ul style="list-style-type: none"> • polyvinylidene chloride (PVdC) (applied from September 2025) • vinyl chloride <p>For products containing PVdC, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	
13.20.8 - Oxo-degradable Plastics (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
13.20.9 - Polystyrene (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
13.20.10 - PFAS (Per- and polyfluoroalkyl substances) (higher)	<p>The standard is amended as follows:</p> <p>This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

4. Updates to GB and SA GB Feed Processing Standards

Standard	Description of changes	Reason for update
8.10.1 - Using Accurate Descriptions*	The text has been removed from the guidance.	Misleading labelling is already covered in legislation.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

(baseline)	If you produce organic and non-organic lines in the same range, you need to make sure that the packaging is sufficiently distinguishable (for example by colour, design or wording) to prevent confusion.	
8.16 - Packaging (higher)	<p>The following text has been added to the packaging standards.</p> <p><u>Following feedback from licensees we have paused the implementation of our 2024/25 updated packaging standards. Whenever we review our higher standards, the process is focused on achieving impact through best practice and reasonable implementation. The implementation of the updated packaging standards has highlighted challenges with conveying technical information about packaging through supply chains and so has been paused until further notice whilst we undertake a further review. This is an important topic which we are committed to getting right. Please direct any feedback to standards@soilassociation.org.</u></p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
8.16.3 - Paper, card and wood-pulp packaging products (higher)	<p>The standard is amended as follows:</p> <p>*This standard comes into effect from September 2025. <u>The implementation of this standard is paused while a review is undertaken.</u></p> <p>The guidance is amended as follows:</p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	Any packaging purchased from September 2025 must be compliant. Packaging purchased prior to September 2025 may be used until stocks are exhausted.	
8.16.4 - Plastic materials, coatings, dyes or inks containing phthalates (higher)	<p>The standard is amended as follows:</p> <p>The <u>implementation of the changes to this standard come into effect from September 2025 are paused while a review is undertaken.</u></p> <p>The guidance is amended as follows:</p> <p><u>The restriction applies to plastic materials, coatings, dyes, or inks in contact with foodstuffs. This restriction applies to all packaging products in scope and is not restricted to plastic materials. However, for plastic materials, coatings, dyes, or inks in contact with foodstuffs the restriction applies from September 2025. For those specific products, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</u></p>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
8.16.5 - PVC and other chlorinated plastics (higher)	<p>The guidance is updated as follows:</p> <p>This restriction applies to all chlorinated plastics which includes:</p> <ul style="list-style-type: none"> • polyvinyl chloride (PVC) • polyvinylidene chloride (PVdC) <i>(applied from September 2025)</i> • vinyl chloride 	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	For products containing PVdC, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.	
8.16.8 - Oxo-degradable Plastics (higher)	The standard is amended as follows: This standard comes into effect from September 2025. <u>The implementation of this standard is paused while a review is undertaken.</u>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
8.16.9 - Polystyrene (higher)	The standard is amended as follows: This standard comes into effect from September 2025. <u>The implementation of this standard is paused while a review is undertaken.</u>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
8.16.10 - PFAS (per-polyfluoroalkyl substances) (higher)	The standard is amended as follows: This standard comes into effect from September 2025. <u>The implementation of this standard is paused while a review is undertaken.</u>	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
9.1.4 - Feeding organic and in-conversion feed (baseline)*	The standard is amended as follows. b) up to 20% of the total average amount of feed can be first year conversion perennial forage crops and protein crops only if they are produced from your own holding, which must: <ul style="list-style-type: none"> • <u>be sown under organic management on land in first year of conversion.</u> • <u>be part of the holding itself and.</u> 	To ensure the SA standard meets regulatory requirements.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<ul style="list-style-type: none"> • <u>not have been under organic production of that holding in the last five years.</u> 	
--	---	--

5. Updates to GB Abattoir & Slaughter Standards

Standard	Description of changes	Reason for update
18.8.3 - Using accurate descriptions* (baseline)	<p>The text has been removed from the guidance.</p> <p>If you produce organic and non-organic lines in the same range, you need to make sure that the packaging is sufficiently distinguishable (for example by colour, design or wording) to prevent confusion.</p>	Misleading labelling is already covered in legislation.

6. Updates to GB and SA GB Seaweed Standards

Standard	Description of changes	Reason for update
14.10.1 - Using accurate descriptions* (baseline)	<p>The text has been removed from the guidance.</p> <p>If you produce organic and non-organic lines in the same range, you need to make sure that the packaging is sufficiently distinguishable (for example by colour, design or wording) to prevent confusion.</p>	Misleading labelling is already covered in legislation.
15.5 - Packaging (higher)	The following text has been added to the packaging standards.	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<p>Following feedback from licensees we have <u>paused the implementation of our 2024/25 updated packaging standards</u>. Whenever we review our higher standards, the process is focused on achieving impact through best practice and reasonable implementation. The <u>implementation of the updated packaging standards has highlighted challenges with conveying technical information about packaging through supply chains and so has been paused until further notice whilst we undertake a further review</u>. This is an important topic <u>which we are committed to getting right</u>. Please direct any feedback to standards@soilassociation.org.</p>	
<p>15.5.3 - Paper, card and wood-pulp packaging products (higher)</p>	<p>The standard is amended as follows:</p> <p>*This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.</p> <p>The guidance is amended as follows:</p> <p>Any packaging purchased from September 2025 must be compliant. Packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>
<p>15.5.4 - Plastic materials, coatings, dyes or inks containing phthalates (higher)</p>	<p>The standard is amended as follows:</p> <p>The <u>implementation of the changes to this standard come into effect from September 2025 are paused while a review is undertaken</u>.</p> <p>The guidance is amended as follows:</p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	<p>The restriction applies to plastic materials, coatings, dyes, or inks in contact with foodstuffs. <u>This restriction applies to all packaging products in scope and is not restricted to plastic materials.</u> However, for plastic materials, coatings, dyes, or inks in contact with foodstuffs the restriction applies from September 2025. For those specific products, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	
<p>15.5.5 - PVC and other chlorinated plastics (higher)</p>	<p>The guidance is updated as follows:</p> <p>This restriction applies to all chlorinated plastics which includes:</p> <ul style="list-style-type: none"> • polyvinyl chloride (PVC) • polyvinylidene chloride (PVdC) (applied from September 2025) • vinyl chloride <p>For products containing PVdC, any packaging purchased from September 2025 must be compliant and packaging purchased prior to September 2025 may be used until stocks are exhausted.</p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>
<p>15.5.8 - Oxo-degradable Plastics (higher)</p>	<p>The standard is amended as follows:</p>	<p>Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.</p>

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

	This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.	
15.5.9 - Polystyrene (higher)	The standard is amended as follows: This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.
15.5.10 - PFAS (Per- and polyfluoroalkyl substances) (higher)	The standard is amended as follows: This standard comes into effect from September 2025. The implementation of this standard is paused while a review is undertaken.	Recent additions to the packaging standards are on hold whilst we undertake a review of our higher standards for packaging.

7. Updates to SA Glossary

Term	Description of changes	Reason for update
Outdoor range	an outdoor area <u>to which livestock have access. It is mainly covered in vegetation, and which includes soil connected to subsoil and bedrock. For poultry, part or all of the outdoor range may comprise a fenced area, or 'run'.</u> The use of 'verandas' or other screened in and/or roofed structures attached to a fixed poultry house does not qualify as outdoor range.	This update has been made to provide greater clarity around the relationship between 'range' and 'run'.

8. Updates to SA Sourcing Annex

Sourcing requirement	Description of changes	Reason for update
----------------------	------------------------	-------------------

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.

5.11 Resting the range for laying poultry	For laying poultry, the pasture range must be rested for at least nine months between each flock of laying birds . <u>This requirement does not apply if your poultry: are not reared in batches; are not kept in runs; and are free to roam throughout the day.</u>	To align the wording with SA Farming & Growing standards.
--	--	---

9. Standards that have no significant updates

There are no significant updates to the following standards (typos or errors may have been corrected):

- Health & Beauty
- Textiles
- SA Approved & Verified Inputs

Key to text changes: (~~strikethrough~~ = delete; underlined = new wording; normal text = no change)

*Occurs across multiple standards documents, so precise numbering and/or wording may vary.
